5. Multiple Contracts (ITT 34.4)

- 5.1 Multiple contracts will be permitted in accordance with ITT 34.4. Tenderers are evaluated on basis of Lots and the lowest evaluated tenderer identified for each Lot. The Procuring Entity will select one Option of the two Options listed below for award of Contracts.

OPTION 1

- i) If a tenderer wins only one Lot, the tenderer will be awarded a contract for that Lot, provided the tenderer meets the Eligibility and Qualification Criteria for that Lot.
- ii) If a tenderer wins more than one Lot, the tender will be awarded contracts for all won Lots, provided the tenderer meets the aggregate Eligibility and Qualification Criteria for all the Lots. The tenderer will be awarded the combination of Lots for which the tenderer qualifies and the others will be considered for award to second lowest the tenderers.

OPTION 2

- 5.2 The Procuring Entity will consider all possible combinations of won Lots [contract(s)] and determine the combinations with the lowest evaluated price. Tenders will then be awarded to the Tenderer or Tenderers in the combinations provided the tenderer meets the aggregate Eligibility and Qualification Criteria for all the won Lots.

6. Alternative Tenders (ITT13.1)

- 6.1 *An alternative if permitted under ITT 13, will be evaluated as follows:* The Procuring Entity shall consider Tenders offered for alternatives as specified in Part II Section II, Schedule of Requirements. 7. MARGIN OF PREFERENCE

- 7.1 If the TDS so specifies, the Procuring Entity will grant a margin of preference of 15% (fifteen percent) to Tenderers offering goods manufactured, mined, extracted, grown, assembled or semi-processed in Kenya. Goods assembled or semi-processed in Kenya shall have a local content of not less than 40%.
- 7.2 The margin of preference will be applied in accordance with, and subject to, the following provisions:
- a) Tenderers applying for such preference on goods offered shall be asked to provide, as part of the data for qualification, such information, including details of the goods produced in Kenya, so as to determine whether, according to the classification established by the Procuring Entity, a particular category of goods or group of goods qualifies for a margin of preference.
 - b) After Tenders have been received and reviewed by the Procuring Entity, goods offered in the responsive Tenders shall be assessed to ascertain they are manufactured, mined, extracted, grown,

assembled or semi- processed in Kenya. Responsive tenders shall be classified into the following groups:

- i) **Group A:** Tenders offering goods manufactured in Kenya, for which (a) labor, raw materials, and components from within Kenya account for more than forty (40) percent of the Ex-Works price; and (b) the production facility in which they will be manufactured or assembled has been engaged in manufacturing or assembling such goods at least since the date of Tender submission date;
- ii) **Group B:** All other Tenders offering Goods manufactured in Kenya;
- iii) **Group C:** Tenders offering Goods manufactured outside Kenya that have been already imported or that will be imported.
 - a) To facilitate this classification by the Procuring Entity, the tenderer shall complete whichever version of the Price Schedule furnished in the Tendering document is appropriate, provided however, that the completion of an incorrect version of the Price Schedule by the Tenderer shall not result in rejection of its Tender, but merely in the Procuring Entity's reclassification of the Tender in to its appropriate Tender group.
 - b) The Tenders in each group will then be compared to determine the Tender with the lowest evaluated cost in that group. The lowest evaluated cost Tender from each group shall then be compared with each other and if as a result of this comparison a Tender from Group A or Group B is the lowest, it shall be selected for the award.
 - c) If as a result of the preceding comparison, a Tender from Group C is the lowest evaluated cost, an amount equal to or 15% of the respective tender price, including unconditional discounts and excluding provisional sums, if any, shall be added to the evaluated price offered in each tender from Group C. If the tender from Group C is still the lowest tender, it shall be selected for award. If not, the lowest evaluated tender from Group A or B based on the first evaluation price shall be selected.

8. Post qualification and Contract award (ITT37), more specifically,

8.1 After determining the substantially responsive tender which offers the lowest-evaluated price, whether the tenderer is a manufacturer or just a supplier: The Procuring Entity shall carry out the post-qualification, if no prequalification was done using the following criteria:

- a) In case the tender was subject to post-qualification, the contract shall be awarded to the lowest evaluated tenderer, subject to confirmation of prequalification data, if so required.
- b) In case the tender was not subject to post-qualification, the tender that has been determined to be the lowest evaluated tenderer shall be considered for contract award, subject to meeting each of the following conditions.

General instructions

Please refer to the guidelines for full instructions on how to complete this form and information on the implementation of the Scheme.

The forms are suitable for generation by computer. They should always be submitted as hard copy, with responses printed in type rather than handwritten.

Additional sheets should be appended, as necessary, to accommodate remarks and explanations.

Explanatory notes

¹ This certificate, which is in the format recommended by WHO, establishes the status of the pharmaceutical product and of the applicant for the certificate in the exporting country. It is for a single product only since manufacturing arrangements and approved information for different dosage forms and different strengths can vary.

² Use whenever possible international nonproprietary names (INNs) or national nonproprietary names

³ The formula (complete composition) of the dosage form should be given on the certificate or be appended

⁴ Details of quantitative composition are preferred, but their provision is subject to the agreement of the product-license holder

⁵ When applicable, append details of any restriction applied to the sale, distribution, or administration of the product that is specified in the product license. ⁶ Sections 2A and 2B are mutually exclusive.

⁷ Indicate, when applicable, if the license is provisional or if the product has not yet been approved.

⁸ Specify whether the person responsible for placing the product on the market:

- a) Manufactures the dosage form;
- b) Packages and/or labels a dosage form manufactured by an independent company; or
- c) Is involved in none of the above.

⁹ This information can be provided only with the consent of the product-license holder or, in the case of non-registered products, the applicant. Non completion of this Section indicates that the party concerned has not agreed to inclusion of this information. It should be noted that information concerning the site of production is part of the product license. If the production site is changed, the license must be updated or it will cease to be valid.

¹⁰ This refers to the document, prepared by some national regulatory authorities, that summarizes the technical basis on which the product has been licensed. ¹¹ This refers to product information approved by the competent national regulatory authority, such as a Summary of Product Characteristics (SPC).

¹² In this circumstance, permission for issuing the certificate is required from the product-license holder. This permission must be provided to the authority by the applicant.

¹³ Please indicate the reason that the applicant has provided for not requesting registration:

- a) The product has been developed exclusively for the treatment of conditions-particularly tropical diseases-not endemic in the country of export.
- b) The product has been reformulated with a view to improving its stability under tropical conditions.
- c) The product has been reformulated to exclude excipients not approved for use in pharmaceutical products in the country of import.
- d) The product has been reformulated to meet a different maximum dosage limit for an active ingredient.
- e) Any other reason, please specify.

¹⁴ Not applicable means that the manufacture is taking place in a country other than that issuing the product certificate and inspection is conducted under the aegis of the country of manufacture.

¹⁵ The requirements for good practices in the manufacture and quality control of drugs referred to in the certificate are those included in the thirty-second report of the Expert Committee on Specifications for Pharmaceutical Preparations (WHO Technical Report Series, No.823,1992, Annex1). Recommendations specifically applicable to biological products have been formulated by the WHO Expert Committee on Biological Standardization (WHO Technical Report Series, No.822,1992, Annex1).

¹⁶ This section is to be completed when the product-license holder or applicant conforms to status(b) or(c) as described in note7above. It is of particular importance when foreign contractors are involved in the manufacture of the product. In these circumstances the applicant should supply the certifying authority with information to identify the contracting parties responsible for each stage of manufacture of the finished dosage form, and the extent and nature of any controls exercised over each of these parties.

NOTES FOR PREPARING THE SCHEDULE OF REQUIREMENTS

The Schedule of Requirements shall be included in the tendering document by the Procuring Entity, and shall cover, at a minimum, a description of the goods and services to be supplied and the delivery schedule.

The objective of the Schedule of Requirements is to provide sufficient information to enable Tenderers to prepare their Tenders efficiently and accurately, in particular, the Price Schedule, for which a form is provided in Section IV. In addition, the Schedule of Requirements, together with the Price Schedule, should serve as a basis in the event of quantity variation at the time of award of contract pursuant to ITT 42.1.

The date or period for delivery should be carefully specified, taking into account (a) the implications of delivery terms stipulated in the Instructions to Tenderers pursuant to the *Incoterms* rules (i.e., EXW, or CIP, FOB, FCA terms—that “delivery” takes place when goods are delivered **to the carriers**), and (b) the date prescribed here in from which the Procuring Entity's delivery obligations start (i.e., notice of award, contract signature, opening or confirmation of the Form of credit).

1. LIST OF GOODS AND DELIVERY SCHEDULE

[The Procuring Entity shall fill in this table, with the exception of the column “Tenderer's offered Delivery date ”to be filled by the Tenderer]

Line Item N°	Description of Goods	Quantity	Physical unit	Final (Project Site) Destination as specified in TDS	Delivery (as per Incoterms) Date

2 TECHNICAL SPECIFICATIONS

The purpose of the Technical Specifications (TS), is to define the technical characteristics of the Goods and Related Services required by the Procuring Entity. The Procuring Entity shall prepare the detailed TS take into account that:

- The TS constitute the benchmarks against which the Procuring Entity will verify the technical responsiveness of Tenders and subsequently evaluate the Tenders. Therefore, well-defined TS will facilitate preparation of responsive Tenders by Tenderers, as well as examination, evaluation, and comparison of the Tenders by the Procuring Entity.
- Technical Specifications shall be fully descriptive of the requirements in respect of, but not limited to, the following:
 - a) Standards of materials and workmanship required for the production and manufacturing of the Goods.
 - b) Detailed tests required (type and number).
 - c) Other Related Services required to achieve full delivery/completion.
 - d) Detailed activities to be performed by the Supplier, and participation of the Procuring Entity there on.
 - e) List of detailed functional guarantees covered by the Warranty and the specification of the liquidated damages to be applied in the event that such guarantees are not met.

A set of precise and clear specifications is a prerequisite for Tenderer stores pond realistically and competitively to the requirements of the Procuring Entity without qualifying their Tenders. The sample text provided in this section should serve as guidance only. This text is not intended to be used verbatim since technical specifications specific to each procurement should be drafted by the Procuring Entity for inclusion in the tendering document. In the context of international competitive procurement process among qualified firms, the specifications must be drafted to permit the widest possible. The technical specifications establish the requirements for good manufacturing practices (GMPs), pharmacopeial standards, nomenclature, and description required for each product, shelf life and package expiration date parameters, labeling instructions, packaging instructions, GMP and quality assurance certificates required, and other evidence of product quality to be submitted with the Tender and with each shipment. Only if this is done will the objectives of economy, efficiency, and fairness in procurement be realized, responsiveness of Tenders be ensured, and the subsequent task of Tender evaluation facilitated.

Specific pharmacopeia standards should be listed for each product; if any of a range of standards is adequate (British Pharmacopoeia, United States Pharmacopoeia, European Pharmacopoeia, or International Pharmacopoeia), this should be noted. If special packaging or labeling is required for a subset of products, this should be indicated on the schedule of requirements (see above), but a generic statement of packaging and labeling applied to all products should be included in the general technical specifications. Instructions about labeling (contents and language) and package inserts can be included in the technical specifications, unless there are specific requirements for each batch or schedule of requirement.
